

PDM Workbench NX

The Siemens NX CAD Integration

PDM Workbench NX is an extension of the Siemens NX user interface integrating a lightweight PDM system to manage the data.

Connector

To ease the data management of NX data the connector enables the use of a lightweight PDM system directly within the NX user interface. The connector is dedicated for displaying and manipulating PDM data and enables the designer to take full advantage of PDM capabilities supporting collaborative product development, all within the NX environment the designer is familiar with.

PDM Workbench NX in NX

Benefits

- CAD specific PDM functionality in NX enabling design engineers to stay within NX only
- Allows access to the PDM system from every client machine where the Connector is running

Key Features

- Supports PDM capabilities like query, check out/in, update, create, lock of PDM and CAD data
- Supports templates for new files
- Can be configured to any customer data model

Technical Highlights

- SOAP (Simple Object Access Protocol) based communication (firewall-friendly)
- PDM functionality can be added or removed by configuration
